

Part 2 기본적인 기능의 게시물 관리

Chapter 06 삭제/수정 처리

6.1 삭제 처리

- BoardController

```
@RequestMapping(value = "/remove", method = RequestMethod.POST)
public String remove(@RequestParam("bno")int bno, RedirectAttributes rttr) throws Exception {
    service.remove(bno);
    rttr.addFlashAttribute("msg", "SUCCESS");

    return "redirect:/board/listAll";
}
```

6.2 수정 처리

- BoardController

```
@RequestMapping(value = "/modify", method = RequestMethod.GET)
public void modifyGET(int bno, Model model) throws Exception {
    model.addAttribute(service.read(bno));
}

@RequestMapping(value = "/modify", method = RequestMethod.POST)
public String modifyPOST(BoardVO board, RedirectAttributes rttr) throws Exception {
    logger.info("mod post .....");
    service.modify(board);
    rttr.addFlashAttribute("msg", "SUCCESS");
    return "redirect:/board/listAll";
}
```

- modify.jsp

```
<form role="form" method="post">
    <div class="box-body">
        <div class="form-group">
            <label for="exampleInputEmail1">BNO</label>
            <input type="text" name='bno' class="form-control" value="${boardVO.bno}"
readonly="readonly">
        </div>
        <div class="form-group">
            <label for="exampleInputEmail1">Title</label>
            <input type="text" name="title" class="form-control" value="${boardVO.title}" />
        </div>
    </div>
</form>
```

```

<div class="form-group">
  <label for="exampleInputPassword1">Contents</label>
  <textarea name="contents" class="form-control" rows="3">${boardVO.contents}</textarea>
</div>
<div class="form-group">
  <label for="exampleInputEmail1">Writer</label>
  <input type="text" name="writer" class="form-control" value="${boardVO.writer}"
readonly="readonly" />
</div>
</div>
</form>
<div class="box-footer">
  <button type="submit" class="btn btn-primary">SAVE</button>
  <button type="submit" class="btn btn-warning">CANCEL</button>
</div>

```

```

<script>
$(document).ready(function () {
  var formObj = $("form[role='form']");
  console.log(formObj);
  $(".btn-warning").on("click", function () {
    self.location = "/board/listAll"
  });
  $(".btn-primary").on("click", function () {
    formObj.submit();
  });
});
</script>

```

- 수정페이지 테스트
